Let's Be Clear  
Daavlin Phototherapy Solutions

## 1series

### The Daavlin 1 Series

The Daavlin 1 Series is the most powerful portable phototherapy unit on the market.

## The Daavlin 1 Series IS SAFE, SMALL AND EFFICIENT

The Daavlin 1 Series is a small, portable unit designed for the treatment of localized areas of the body such as the hands and feet. The unit is light-weight, portable, and easy to move.

- The Daavlin 1 Series can lie flat making treatment comfortable and easy.
- A UV transmitting acrylic shield covers and protects the lamps and provides a clear and unobstructed surface to rest hands on during treatments.
- The 1 Series can be positioned on end or on its side for conveniently treating the face or other localized areas of the body.
- With the addition of an optional stand, the Daavlin 1 Series can pivot and rotate to treat comfortably at any angle.
  - Inexpensive and easy to assemble, this accessory makes treating the back of the hands or the top of the feet effortless.
- No special electrical wiring is required.

### Powerful, Innovative and most of all, Effective

The Daavlin 1 Series was built to clear skin quickly. The technology inside is advanced, but on the outside, it's easy to use:

- The lamps used in this device effectively double the power output by virtually eliminating "low energy" spots at the ends of the lamps, a problem commonly seen in competitive units.
- Environmentally friendly "programmed start" ballasts extend lamp life, increase energy output, and give the Daavlin 1 Series an extremely low operating cost.

### Technology

Because therapeutic energy diminishes with distance from the lamps, Daavlin's exclusive Dual Point Dosimetry system with built-in metering is an option that delivers exactly the right amount of energy, regardless of how the device is being used. Simply select the treatment "location" and the system adjusts the treatment times accordingly.

Alternatively the device can be equipped with Daavlin's Flex digital timer in which the desired treatment time is entered in minutes and seconds.

### Daavlin 1 Series Data

Treatment Area	9.25x18 in	(23.5x45.7 cm)
Height	21.75 in	(55.2 cm)
Width	9.75 in	(24.7 cm)
